

NOTICE TO URGENT CARE PATIENTS

Missoula Bone & Joint is a walk-in orthopedic clinic and not a free-standing Urgent Care facility. We are required to bill your urgent care visit to your insurance company with the place of service as “Office” visit instead of “Urgent Care”.

What this means is that your insurance company may pay the benefits differently if billed under “Office” versus “Urgent Care” and your out-of-pocket expense may differ with co-payments, co-insurance and deductible.

Attention Patients with Missoula County Benefits:

If you have a NEW injury and are being treated through Urgent Care, you are only responsible for a \$15 co-pay (no deductible or co-insurance) for your initial visit and one x-ray. For any follow-up visits you will be responsible for any deductible or co-insurance amounts.

Please check with your insurance carrier if you have questions about your Urgent Care benefits.

Thank you for trusting your care with us!
